North Park Niobrara field, Jackson County, Colorado: site sizing

What this gas could power, how much land it would take, and what it could earn each year.

24.1 MW	21	34 ac	1,805k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
Fixed price	$34k to $68k	Gas plus lease

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=GAS&FLOW=5.02

THE MATH

Firm gas take, as pipeline-gas equivalent	5.02 MMcf/d
Energy in the gas	216.9 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 24.1 MW
Compute (power less cooling and losses, /1.2)	about 20.1 MW
Compute modules (about 1 MW each)	21
Gas engines (running plus one spare)	7 at 4.5 MW
Land: 5 acres plus 1.2 acres per MW	about 34 acres
Gas bought per year (95% run time)	1,805k MMBtu
Gas payment	Fixed price
Land lease at $1,000 to $2,000 per acre per year	$34k to $68k

The field gas is rich, about 1,360 Btu per cubic foot (ECMC), and the site sits at about 8,100 feet, which cuts engine output by about 15%. A take of 4,500 Mcf/d is shown as its pipeline-gas equivalent after that derate: about 5.0 MMcf/d at 1,037 Btu per cubic foot. Prices in US dollars; the gas price is set in the gas agreement.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas volume and analysis by pad for 12 to 24 months
- Which pads have gas not yet committed
- The drilling plan for 2027 to 2029
- Liquids removal for the rich gas; two fiber routes into the valley

Source: Colorado ECMC Form 7 production reports: Fulcrum's North Park wells averaged about 5,726 Mcf/d from January to July 2026 (lowest month in two years 4,498 Mcf/d), with no gas pipeline out of the basin. Sized to a firm take of 4,500 Mcf/d. This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
