Skabo field pads, Williams and Divide counties, North Dakota: a first sizing

What this gas could power, how much land it would take, and what it could earn each year.

5.6 MW	5	12 ac	421k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $316k	$12k to $23k	$12k to $339k

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=GAS&FLOW=1.17

THE MATH

Methane in 2 MMcf/d of flared gas, as pipeline-quality gas	1.17 MMcf/d
Energy in the gas	50.6 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 5.6 MW
Compute (power less cooling and losses, /1.2)	about 4.7 MW
Compute modules (about 1 MW each)	5
Gas engines (running plus one spare)	4 at 2.5 MW
Land: 5 acres plus 1.2 acres per MW	about 12 acres
Gas bought per year (95% run time)	421k MMBtu
Gas payment, up to $0.75/MMBtu	up to $316k
Land lease at $1,000 to $2,000 per acre per year	$12k to $23k

Sized on the methane only: 2 MMcf/d at about 60% methane and 1,012 Btu per cubic foot, shown as 1.17 MMcf/d of pipeline-quality gas at 1,037 Btu. Heavier gases would add energy and are not counted. Prices in US dollars; field gas at $0 to $0.75 per MMBtu.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas analysis at the pads
- Expected decline and any gathering hookup date
- A small fenced parcel near the pads
- Fiber route

Source: North Dakota DMR monthly production report, August 2026: the three pads flared about 3.0 MMcf/d (Jun-Aug 2026: 3.5, 3.2, 3.0). Sized on 2.0 MMcf/d to allow for decline. Methane share of 60% is a Bakken basin figure (DOE NETL); the sizing counts the methane only. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
