Brady Road Resource Management Facility, Winnipeg, Manitoba: site sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

1.3 MW	2	7 ac	118k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $353k	$7k to $13k	$7k to $366k

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=LFG&FLOW=582&CH4=40

THE MATH

Landfill gas flared (2025)	582 scfm
Methane content (2025 daily readings)	40%
Energy in the gas	14.1 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 1.3 MW
Compute (power less cooling and losses, /1.2)	about 1.1 MW
Compute modules (about 1 MW each)	2
Gas engines (running plus one spare)	2 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 7 acres
Gas bought per year (95% run time)	118k MMBtu
Gas payment, up to $3.00/MMBtu	up to $353k
Land lease at $1,000 to $2,000 per acre per year	$7k to $13k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas trend: about 818 scfm in 2024, 582 in 2025
- Methane fell after a July 2024 water event; a current gas analysis is needed
- Manitoba rules for a third-party gas sale at a municipal site
- A fenced parcel near the flare

Source: City of Winnipeg, Brady Road Resource Management Facility 2025 Annual Report, with the landfill gas collection and flaring report dated Mar 23, 2026 (read Nov 12, 2026): over 306 million scf of landfill gas flared in 2025, metered at the flare. Methane is not given as an annual average; 40% is read from the report's 2025 daily readings (36.6% to 42.1%). This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
