Long Canyon facility, Cane Creek Unit, Grand County, Utah: site sizing

What this gas could power, how much land it would take, and what it could earn each year.

5.3 MW	5	11 ac	396k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $1.19M	$11k to $23k	$11k to $1.21M

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=GAS&FLOW=1.1

THE MATH

Gas flared or vented at the facility, January to August 2026 average, as pipeline-gas equivalent	1.1 MMcf/d
Energy in the gas	47.5 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 5.3 MW
Compute (power less cooling and losses, /1.2)	about 4.4 MW
Compute modules (about 1 MW each)	5
Gas engines (running plus one spare)	4 at 2.5 MW
Land: 5 acres plus 1.2 acres per MW	about 11 acres
Gas bought per year (95% run time)	396k MMBtu
Gas payment, up to $3.00/MMBtu	up to $1.19M
Land lease at $1,000 to $2,000 per acre per year	$11k to $23k

The state reports about 1,266 Mcf/d flared or vented, at about 900 Btu per cubic foot (the heating value in the same report). Shown as its pipeline-gas equivalent at 1,037 Btu per cubic foot: about 1.1 MMcf/d. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- 12 to 24 months of daily gas volumes; monthly volumes in 2026 ranged from about 560 to about 1,800 Mcf/d
- A recent gas analysis (H2S, CO2, nitrogen)
- Utah DOGM flaring rules, and a Utah Division of Air Quality approval order for the engines
- BLM Moab Field Office approval on the federal leases, and Grand County's data center standards (180-day pause adopted July 7, 2026)

Source: Utah Division of Oil, Gas and Mining, gas plant monthly reports (PlantSummary), Long Canyon, January to August 2026: https://oilgas.ogm.utah.gov/pub/Database/PlantSummary.zip (seen 2026-11-12). This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
