Waste Connections Navan Waste Recycling and Disposal Facility, Ottawa, Ontario: site sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

1.1 MW	1	6 ac	103k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $309k	$6k to $13k	$6k to $322k

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=LFG&FLOW=378&CH4=54

THE MATH

Landfill gas flared (2025)	378 scfm
Methane content (2025)	54%
Energy in the gas	12.4 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 1.1 MW
Compute (power less cooling and losses, /1.2)	about 0.9 MW
Compute modules (about 1 MW each)	1
Gas engines (running plus one spare)	2 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 6 acres
Gas bought per year (95% run time)	103k MMBtu
Gas payment, up to $3.00/MMBtu	up to $309k
Land lease at $1,000 to $2,000 per acre per year	$6k to $13k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas trend: over 5.7 million m3 collected in 2024, over 5.6 million in 2025
- Whether more wells are planned in the active cells
- A fenced parcel near the flare
- Road and fiber access

Source: Ontario Ministry of the Environment, Conservation and Parks, Landfill Gas Collection, Use and Destruction dataset, 2025 rows (file updated Jul 27, 2026; read Nov 12, 2026): over 5.6 million m3 of landfill gas collected, 100% of it flared, at 54% methane. Shown in scfm treating the reported m3 as standard cubic meters. This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
