WV Mineral Group gas wells within 5 km of the cluster center, Barbour, Preston and Taylor counties, West Virginia: site sizing

What this gas could power, how much land it would take, and what it could earn each year.

4.6 MW	5	11 ac	345k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $1.04M	$11k to $21k	$11k to $1.06M

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=GAS&FLOW=0.96

THE MATH

Gas produced by the wells within 5 km, 2025 average	0.96 MMcf/d
Energy in the gas	41.5 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 4.6 MW
Compute (power less cooling and losses, /1.2)	about 3.8 MW
Compute modules (about 1 MW each)	5
Gas engines (running plus one spare)	3 at 2.5 MW
Land: 5 acres plus 1.2 acres per MW	about 11 acres
Gas bought per year (95% run time)	345k MMBtu
Gas payment, up to $3.00/MMBtu	up to $1.04M
Land lease at $1,000 to $2,000 per acre per year	$11k to $21k

The volume is shown as reported to the state, as if it were pipeline-quality gas at 1,037 Btu per cubic foot; no public gas analysis was found, so the real energy content may differ. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- June and July 2025 show almost no gas while reporting passed from the previous operator; August to December 2025 averaged over 1,000 Mcf/d. Gas volumes by meter for 12 to 24 months
- Which gathering line takes the gas today, and whether any of it runs on lines in the Red Lines case before the WV Public Service Commission (Case 26-0448-G-PC)
- A recent gas analysis (Btu, CO2, nitrogen)
- WV DEP Office of Oil and Gas status of the idle wells in the cluster that could be returned to service
- WV DEP Division of Air Quality Rule 13 permit for the engines

Source: West Virginia DEP Office of Oil and Gas, 2025 annual production report: WV Mineral Group wells within 5 km of 39.2932 N, 79.8920 W (239 wells, 217 producing; 349,757 Mcf over 365 days; 1,182 Mcf/d in 2024), located with WV DEP TAGIS well records: https://apps.dep.wv.gov/Documents/OOG/ProductionReports/2020-2029/2025Production.xlsx (seen 2026-11-13). This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
