# Ohio County Balefill Landfill, Beaver Dam, Kentucky: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

| 2.3 MW | 2 | 8 ac | 211k |
|---|---|---|---|
| POWER FROM THE GAS | COMPUTE MODULES | LAND NEEDED | MMBTU BOUGHT / YR |

| GAS SALE, PER YEAR | LAND LEASE, PER YEAR | TOTAL TO THE OWNER, PER YEAR |
|---|---|---|
| $316k to $527k | $8k to $16k | $324k to $542k |

## THE MATH

| | |
|---|---|
| Landfill gas collected and flared (2022) | 849 scfm |
| Methane content (2022) | 49.1% |
| Energy in the gas | 25.3 MMBtu per hour |
| Power at a heat rate of 11,000 Btu/kWh | about 2.3 MW |
| Compute (power less cooling and losses, /1.2) | about 1.9 MW |
| Compute modules (about 1 MW each) | 2 |
| Gas engines (running plus one spare) | 3 at 1.6 MW |
| Land: 5 acres plus 1.2 acres per MW | about 8 acres |
| Gas bought per year (95% run time) | 211k MMBtu |
| Gas payment at $1.50 to $2.50 per MMBtu | $316k to $527k |
| Land lease at $1,000 to $2,000 per acre per year | $8k to $16k |

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

## WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed or floored price.

## WORTH CHECKING

- Who holds the gas rights: the County or the site operator
- Latest flow and methane data
- Space for a small fenced parcel near the flare
- Gas quality (siloxanes, H2S) for engines

**Source:** EPA Landfill Methane Outreach Program (LMOP) database, September 2024 release (2022 data): gas collected and flared, no energy project. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
