# Field gas sold at the source: a first sizing

What 2 or 5 million cubic feet a day, bought at a field or gathering point on a multi-year term, could power and earn, with the math shown.

| 2 MMCF/D, PER YEAR | 5 MMCF/D, PER YEAR | PRICE BASIS |
|---|---|---|
| $1.45M to $2.19M | $3.63M to $5.46M | Fixed, or a floor above the local index |

2 AND 5 MMCF/D IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL

2 MMCF/D

| | |
|---|---|
| Power from the gas | about 9.6 MW |
| Compute modules | 9 |
| Gas engines (running plus one spare) | 5 at 2.5 MW |
| Land | about 17 acres |
| Gas bought per year | 719k MMBtu |
| Gas payment at $2.00 to $3.00/MMBtu | $1.44M to $2.16M |
| Land lease at $1,000 to $2,000/acre | $17k to $33k |
| **Total per year** | **$1.45M to $2.19M** |

5 MMCF/D

| | |
|---|---|
| Power from the gas | about 24.0 MW |
| Compute modules | 21 |
| Gas engines (running plus one spare) | 7 at 4.5 MW |
| Land | about 34 acres |
| Gas bought per year | 1,798k MMBtu |
| Gas payment at $2.00 to $3.00/MMBtu | $3.60M to $5.39M |
| Land lease at $1,000 to $2,000/acre | $34k to $68k |
| **Total per year** | **$3.63M to $5.46M** |

## THE MATH

Gas at 1,037 Btu per cubic foot; engines at a heat rate of 9,000 Btu/kWh; compute is power divided by 1.2 for cooling and losses; compute modules of about 1 MW each; land of 5 acres plus 1.2 acres per MW; 95% run time. The same math runs on our Site model page, where any flow can be tried. Prices in US dollars.

## WHAT IT WOULD LOOK LIKE

- Engines and compute modules on a small parcel next to the tap, with no grid connection.
- Steady take, every day, for the length of the tenant's lease. We build and run the site; the owner puts in no capital.
- Needs gas that can be contracted for years, ideally with a gathering-line backup.

This is a first read, not an offer: no cost and no obligation. The real price, volume and term are set in the gas agreement after a review of the supply, the surface and the route to fiber. Send a field or tap location and a flow, and we reply with a sizing for that point.
