Altamont Landfill & Resource Recovery Facility, Livermore, California: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

6.5 MW	6	13 ac	591k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $1.77M	$13k to $25k	$13k to $1.80M

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=LFG&FLOW=2437&CH4=47.7

THE MATH

Landfill gas to the flares beyond the turbine plant (2023)	2,437 scfm
Methane content (2023)	47.7%
Energy in the gas	71.0 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 6.5 MW
Compute (power less cooling and losses, /1.2)	about 5.4 MW
Compute modules (about 1 MW each)	6
Gas engines (running plus one spare)	6 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 13 acres
Gas bought per year (95% run time)	591k MMBtu
Gas payment, up to $3.00/MMBtu	up to $1.77M
Land lease at $1,000 to $2,000 per acre per year	$13k to $25k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas rights and any existing gas agreement
- Local air district permit (CEQA review)
- Tie-in under the landfill's Title V permit (NSPS Subpart XXX, NESHAP Subpart AAAA)
- County or municipal zoning for the data hall

Source: EPA Greenhouse Gas Reporting Program, 2023: about 4,840 scfm collected at 47.7% methane. The turbine plant uses about 2,400 scfm (EPA Landfill Methane Outreach Program); the LNG plant left service in June 2023, so about 2,400 scfm goes to the flares. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
