Jefferson County Landfill, Pine Bluff, Arkansas: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

1.4 MW	2	7 ac	129k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $387k	$7k to $13k	$7k to $400k

THE MATH

Landfill gas collected and flared (2022)	488 scfm
Methane content (2022)	52.3%
Energy in the gas	15.5 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 1.4 MW
Compute (power less cooling and losses, /1.2)	about 1.2 MW
Compute modules (about 1 MW each)	2
Gas engines (running plus one spare)	2 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 7 acres
Gas bought per year (95% run time)	129k MMBtu
Gas payment, up to $3.00/MMBtu	up to $387k
Land lease at $1,000 to $2,000 per acre per year	$7k to $13k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Latest flow and methane data; the permit's emissions basis uses a peak of 1,500 scfm
- Whether the gas is set aside for another use
- Gas outlook after the listed 2040 closure
- Space for a small fenced parcel near the flare
- Gas quality (siloxanes, H2S) for engines

Source: EPA Landfill Methane Outreach Program (LMOP) database, September 2024 release (2022 data): about 0.70 million cubic feet a day (488 scfm) flared at 52.3% methane; open, closure year 2040. ADEQ Title V renewal 1887-AOP-R6 (final 2025-05-14): an open flare, no engines. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
