Example: West Virginia field gas at one delivery point: a first sizing

What this gas could power, how much land it would take, and what it could earn each year.

24.0 MW	21	34 ac	1,798k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
$2.70M to $5.39M	$34k to $68k	$2.73M to $5.46M

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=GAS&FLOW=5

THE MATH

Gas delivered at one meter (example)	5 MMcf/d
Energy in the gas	216.0 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 24.0 MW
Compute (power less cooling and losses, /1.2)	about 20.0 MW
Compute modules (about 1 MW each)	21
Gas engines (running plus one spare)	7 at 4.5 MW
Land: 5 acres plus 1.2 acres per MW	about 34 acres
Gas bought per year (95% run time)	1,798k MMBtu
Gas payment, $1.50 to $3.00/MMBtu	$2.70M to $5.39M
Land lease at $1,000 to $2,000 per acre per year	$34k to $68k

Field gas at 1,037 Btu per cubic foot. Prices in US dollars; the gas price band is an example for gas bought at market in Appalachia, set in the gas agreement.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Built in phases: about 1 MMcf/d (about 5 MW) first, then module by module up to the gas available
- Gas bought at the meter on a long-term firm contract, fixed or index price
- Permits: WVDEP air quality R13 permit for the engines, plus county floodplain and building permits
- No grid connection needed: the engines power the site directly

Source: Example sizing by Accretion Compute, November 2026, using the same math as the Site model on accretioncompute.com. Not tied to a specific meter; actual size follows the gas available. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
