LCS Services Landfill, Hedgesville, Berkeley County, West Virginia: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

2.2 MW	2	8 ac	206k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $154k	$8k to $15k	$8k to $170k

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=LFG&FLOW=965&CH4=42

THE MATH

Landfill gas collected and flared (2023)	965 scfm
Methane content (2023)	42.2%
Energy in the gas	24.7 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 2.2 MW
Compute (power less cooling and losses, /1.2)	about 1.9 MW
Compute modules (about 1 MW each)	2
Gas engines (running plus one spare)	3 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 8 acres
Gas bought per year (95% run time)	206k MMBtu
Gas payment, up to $0.75/MMBtu	up to $154k
Land lease at $1,000 to $2,000 per acre per year	$8k to $15k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- 2022 was a little lower (about 1.25 million cubic feet a day at 44.5%, about 2.1 MW)
- Whether the gas is free of other plans
- Space for a small fenced parcel near the flare
- Gas quality (siloxanes, H2S) for engines
- Berkeley County land use rules for the parcel

Source: EPA Greenhouse Gas Reporting Program, Subpart HH (pulled 2026-11-07): 2023 about 1.39 million cubic feet a day (about 965 scfm) at 42.2% methane, destroyed on site; 1.25 to 1.64 million cubic feet a day since 2019. EPA LMOP lists the site as a candidate only. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
