Northwestern Landfill, Parkersburg, West Virginia: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

2.8 MW	3	8 ac	257k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $193k	$8k to $17k	$8k to $210k

THE MATH

Landfill gas collected and flared (2022)	1,106 scfm
Methane content (2022)	46%
Energy in the gas	30.9 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 2.8 MW
Compute (power less cooling and losses, /1.2)	about 2.3 MW
Compute modules (about 1 MW each)	3
Gas engines (running plus one spare)	3 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 8 acres
Gas bought per year (95% run time)	257k MMBtu
Gas payment, up to $0.75/MMBtu	up to $193k
Land lease at $1,000 to $2,000 per acre per year	$8k to $17k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Sized to 2022, the lower of the two newest EPA years; 2023 would give about 3.1 MW instead of about 2.8 MW
- Whether the owner has any plan for the gas (RNG or power)
- Gas quality (siloxanes, H2S, oxygen) for engines

Source: EPA Greenhouse Gas Reporting Program, Subpart HH, facility 1007587 (Envirofacts, pulled 2026-11-07): 2022 about 1,106 scfm (about 1.59 million cubic feet a day) at 46.0% methane, all destroyed on site. 2023, the newest year, was a little higher: about 1,154 scfm at 48.0%. 2020-2023 held at about 1,100 to 1,230 scfm. Sized to 2022, the lower of the two newest years. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
