# Big Escambia Creek gas plant, Escambia County, Alabama: site sizing

What this gas could power, how much land it would take, and what it could earn each year.

| 3.8 MW | 4 | 10 ac | 288k |
|---|---|---|---|
| POWER FROM THE GAS | COMPUTE MODULES | LAND NEEDED | MMBTU BOUGHT / YR |

| GAS SALE, PER YEAR | LAND LEASE, PER YEAR | TOTAL TO THE OWNER, PER YEAR |
|---|---|---|
| up to $863k | $10k to $19k | $10k to $882k |

## THE MATH

| | |
|---|---|
| Gas flared at the off-spec residue flare, EPA-reported engineering estimate (not metered), 2023 average, as pipeline-gas equivalent | 0.8 MMcf/d |
| Energy in the gas | 34.6 MMBtu per hour |
| Power at a heat rate of 9,000 Btu/kWh | about 3.8 MW |
| Compute (power less cooling and losses, /1.2) | about 3.2 MW |
| Compute modules (about 1 MW each) | 4 |
| Gas engines (running plus one spare) | 3 at 2.5 MW |
| Land: 5 acres plus 1.2 acres per MW | about 10 acres |
| Gas bought per year (95% run time) | 288k MMBtu |
| Gas payment, up to $3.00/MMBtu | up to $863k |
| Land lease at $1,000 to $2,000 per acre per year | $10k to $19k |

Flare gas at about 80% methane (EPA GHGRP 2023) is shown as its pipeline-gas equivalent at 1,037 Btu per cubic foot: about 1,034 Mcf/d of flare gas is about 0.8 MMcf/d equivalent. Only the methane is counted, at about 1,012 Btu per cubic foot. Prices in US dollars; the price band is the one shown on our Site model page.

## WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

### WORTH CHECKING

- Whether the off-spec residue is still flared, and what makes it off-spec (nitrogen, H2S or Btu)
- The plant's current owner
- Alabama air permit for the engines

**Source:** EPA-reported figure. EPA Greenhouse Gas Reporting Program, subpart W flare data, reporting year 2023 (latest EPA has published), facility 1002251: https://data.epa.gov/efservice/EF_W_FLARE_STACKS_UNITS/FACILITY_ID/1002251/JSON (seen 2026-11-12). This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
