DTM Sabine treating facility, Many, Louisiana: site sizing

What this gas could power, how much land it would take, and what it could earn each year.

8.4 MW	8	15 ac	633k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $1.90M	$15k to $30k	$15k to $1.93M

THE MATH

Gas flared at the Sabine high-pressure flare, EPA-reported, 2023 average, as pipeline-gas equivalent	1.76 MMcf/d
Energy in the gas	76.0 MMBtu per hour
Power at a heat rate of 9,000 Btu/kWh	about 8.4 MW
Compute (power less cooling and losses, /1.2)	about 7.0 MW
Compute modules (about 1 MW each)	8
Gas engines (running plus one spare)	5 at 2.5 MW
Land: 5 acres plus 1.2 acres per MW	about 15 acres
Gas bought per year (95% run time)	633k MMBtu
Gas payment, up to $3.00/MMBtu	up to $1.90M
Land lease at $1,000 to $2,000 per acre per year	$15k to $30k

Flare gas at about 93% methane (EPA GHGRP 2023) is shown as its pipeline-gas equivalent at 1,037 Btu per cubic foot: about 1,935 Mcf/d of flare gas is about 1.76 MMcf/d equivalent. Only the methane is counted, at about 1,012 Btu per cubic foot. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Our own gas engines on a fenced parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- 24 months of metered flare volumes by stack, with the cause of each event
- H2S and CO2 in the flared stream
- Louisiana Office of Conservation Statewide Order 29-B on flaring, and an LDEQ air permit for the engines (LAC 33:III)
- Sabine Parish site review for the parcel

Source: EPA-reported figure. EPA Greenhouse Gas Reporting Program, subpart W flare data, reporting year 2023 (latest EPA has published), facility 1013593: https://data.epa.gov/efservice/EF_W_FLARE_STACKS_UNITS/FACILITY_ID/1013593/JSON (seen 2026-11-12). This is an estimate from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
