Central Disposal Site, Petaluma, California: a first sizing

What the gas the site now flares could power, how much land it would take, and what it could earn each year.

4.8 MW	5	11 ac	442k
POWER FROM THE GAS	COMPUTE MODULES	LAND NEEDED	MMBTU BOUGHT / YR

GAS SALE, PER YEAR	LAND LEASE, PER YEAR	TOTAL TO THE OWNER, PER YEAR
up to $332k	$11k to $22k	$11k to $353k

YOUR SITE IN OUR LIVE 3D MODEL — ACCRETIONCOMPUTE.COM/SITE-MODEL?SRC=LFG&FLOW=1750&CH4=50

THE MATH

Landfill gas beyond the existing engines (2023 to 2025)	1,750 scfm
Methane content (2023)	50%
Energy in the gas	53.1 MMBtu per hour
Power at a heat rate of 11,000 Btu/kWh	about 4.8 MW
Compute (power less cooling and losses, /1.2)	about 4.0 MW
Compute modules (about 1 MW each)	5
Gas engines (running plus one spare)	5 at 1.6 MW
Land: 5 acres plus 1.2 acres per MW	about 11 acres
Gas bought per year (95% run time)	442k MMBtu
Gas payment, up to $0.75/MMBtu	up to $332k
Land lease at $1,000 to $2,000 per acre per year	$11k to $22k

Landfill gas: about 1,012 Btu per cubic foot of methane. Prices in US dollars; the price band is the one shown on our Site model page.

WHAT IT WOULD LOOK LIKE

- Gas engines on a small parcel near the gas, a battery to smooth the load, and factory-built compute modules leased to an AI company.
- No grid connection and no export: all of the power is used on site.
- We build and run the site. The owner puts in no capital.
- Multi-year gas and land agreements, matched to the tenant's lease, at a fixed price.

WORTH CHECKING

- Gas rights and any existing gas agreement
- Local air district permit (CEQA review)
- Tie-in under the landfill's Title V permit (NSPS Subpart XXX, NESHAP Subpart AAAA)
- County or municipal zoning for the data hall

Source: EPA Greenhouse Gas Reporting Program, 2023: about 1,843 scfm collected at 50% methane. EIA shows the site's engines made 2,350 MWh in 2025 (about 0.27 MW average); the rest, about 1,750 scfm, goes to the flare. This is a first read from public data, not an offer: no cost and no obligation. The real price and terms are set in the gas and land agreements after a site review.
